Remarks

This appropriation is intended to cover expenditure aiming to reduce the economic, social and territorial disparities, which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring, clean energy transition, digitalisation of the workplace, growing skills and labour shortages and the implications and impact of demographic change, including population ageing, in order to create a more social Europe. This is to be done in line with the principles of the European Pillar of Social Rights.

It will cover the following three categories of regions:

- less developed regions, with a GDP per capita less than 75 % of the average GDP of the Union,
- transition regions, with a GDP per capita between 75 % and 100 % of the average GDP of the Union,
- more developed regions, with a GDP per capita above 100 % of the average GDP of the Union.

Promotion of equality between women and men horizontally and through specific actions should be part of the support provided by the ESF+, in order to increase the participation of women in employment as well as conciliation between working and personal life, and combat the feminisation of poverty and gender discrimination in the labour market and in education and training.
